

## **BAMBA PARTNERS WITH IVISA.COM TO OFFER THE SIMPLEST SOLUTION FOR PROCESSING TRAVEL VISAS**

**Mexico City, Mexico – September, 2019.** With immediate effect, bamba has partnered with [iVisa.com](https://www.ivisa.com), a hassle-free website for expedited processing and guidance of visa applications worldwide. iVisa offers two types of Visa: Electronic visas (e-Visas) and traditional paper visas.

Since iVisa.com was founded in 2012, it has provided a simple solution for those looking to process a travel visa. Travellers from around the world can put aside any research and no longer have to deal with foreign governments and/or embassies.

Visas are instead processed online directly from a computer, smartphone, or tablet. Travel agents, too, as well as destination management companies can use iVisa.com to process any type of travel visa.

The up-to-date *visa requirements tool* allows travellers to search if any kind of visa is required for their trip. Based on the provided information, iVisa will show costs, number of entries, start date and allow users to subsequently apply directly on their website. With years of experience and aimed at providing a streamlined, user-friendly application process, the iVisa team of immigration experts reviews all documentation before sending them to respective governments.

For many countries, the process for an e-Visa can be completed in as quickly as 15 minutes. Other countries can take up to 24 hours. Exact times are indicated on each visa application form. iVisa also provides services such as Electronic Travel Authorisations, Tourist Cards, Tourist Invitation Letters, and more.

**About bamba**

[bamba](#) takes you on extraordinary experiences to unbelievable places around the globe with unique trip styles for every type of traveller. Redefine the way you experience the world, engaging with locals, immersing yourself in nature and learning about intriguing cultures.
